

Brightspace Course Package Use Instructions

Created: September 2024

The below instructions are for uploading a course package from the eCampusOntario Open Library to D2L's Brightspace LMS. All instructions below were created based on testing from July – August 2024 using a Brightspace v.20.24.x installation.

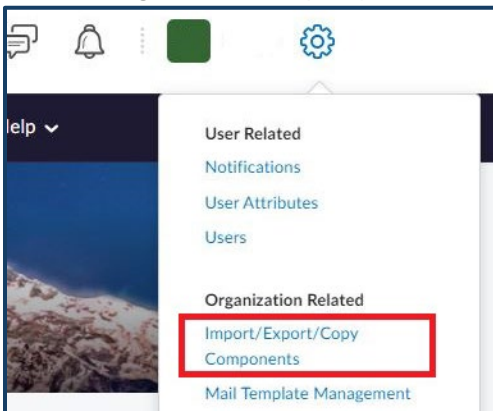

Download Content

1. Open the record for the Open Library resource that you are interested in.
2. Download the course package file(s).
 - a. Course package files can be SCORM Packages or Common Cartridge.
 - b. Download the file labeled for the specific type of course package file that you wish to import.

Import Content

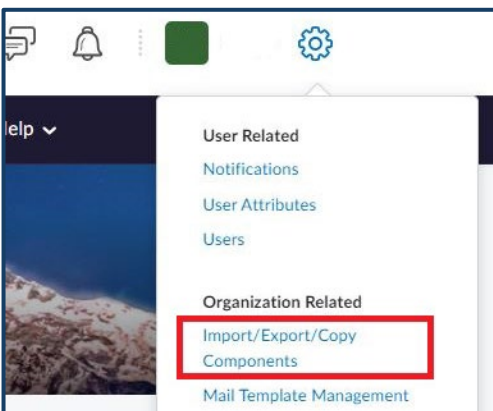

SCORM Packages & Common Cartridge (.IMSCC files)

1. Login to your Brightspace account.
2. Select the gear icon to open your settings and choose “Import/Export/Copy Components”.
