Impact of online learning on school education

I have chosen this topic because I found it interesting and trendy as this was published recently and also this is a rising problem. This was totally to be come out and to be reached to as many people as possible. I think so there is a lot of impact on the students due to the online classes which leads students to stressful mind and sometimes the student lack in their field as they don't give much attention to the topic and also sometime don't attend their online classes. These Online classes have spoiled many things like full attention of student toward each and every subject.
