

TRANSFORMING ASSESSMENT

— STRATEGIES FOR HIGHER EDUCATION —

Accessible Activity Text

Module 1 - Slide: Activity: Reliability and Validity (8.8)

SCENARIO

You are grading an assessment in which all students respond to a question in a similar, incorrect way. You know students have not met expectations, but because this cohort has a reputation for writing very negative course evaluations, you decide to increase all of the students' grades on this assignment.

EXPLANATION

This activity consistently hits the same spot (reliable) but not the target (lacks accuracy/validity).
