

Blackboard Ultra Course Package Use Instructions

Date Created: August 2024

The below instructions are for uploading a course package from the eCampusOntario Open Library to Blackboard Ultra. All instructions below were created based on testing from July – August 2024 using a Blackboard Ultra installation.

Download Content

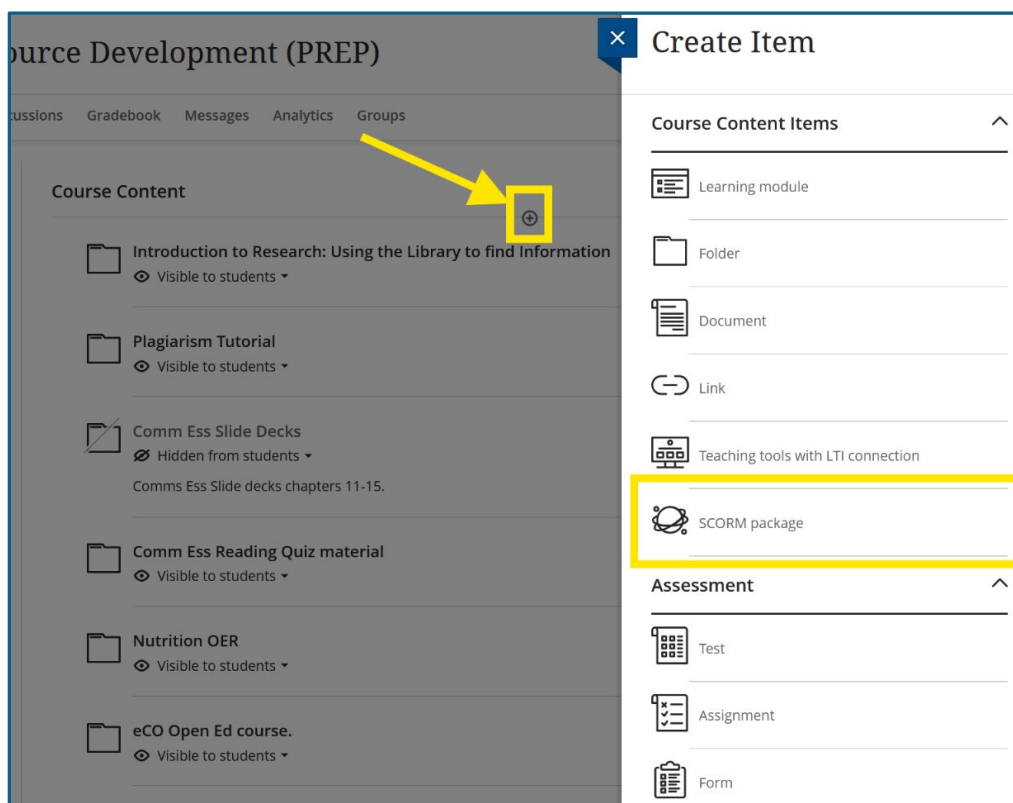

1. Open the record for the Open Library resource that you are interested in.
2. Download the course package file(s).
 - a. Course package files can be SCORM Packages or Common Cartridge.
 - b. Download the file labeled for the specific type of course package file that you wish to import.

Import Content

SCORM packages

1. Login to your Blackboard Ultra account.
2. Click Create > SCORM package on the course content page in Blackboard Ultra.
3. Upload the zip file.
4. Assign settings for your course including due date.
5. Save.
6. Click on the module and use "Preview SCORM" to review.

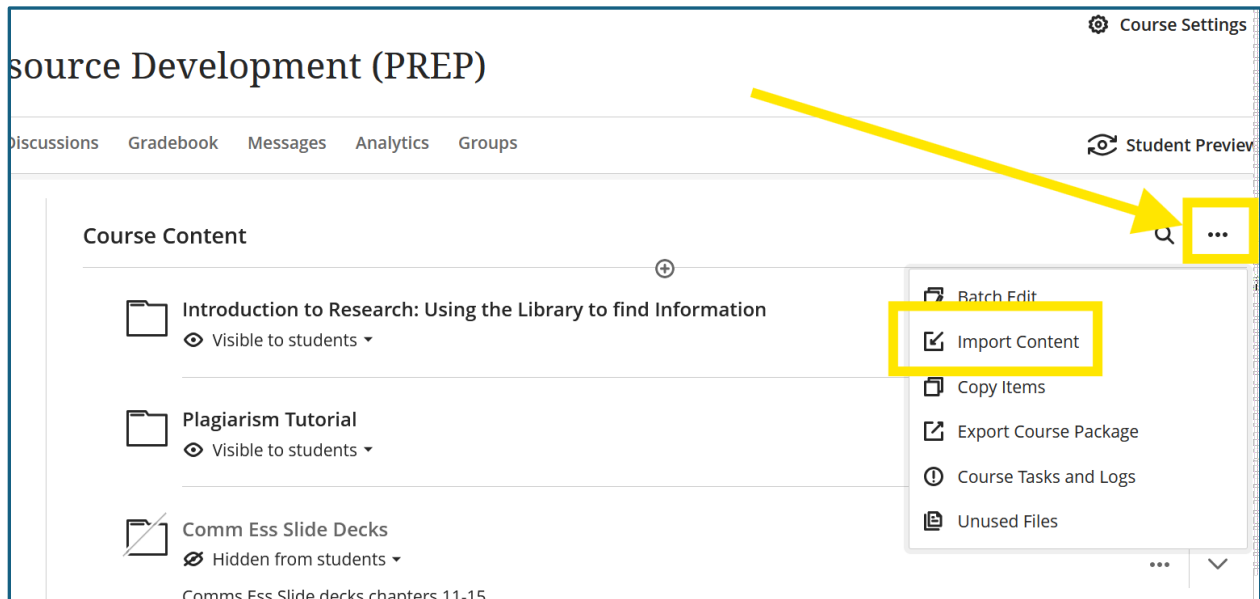

This will add a grade center entry for the SCORM activity/course.

Common Course Cartridges (.IMSCC files)

1. Login to your Blackboard Ultra account.
2. Use the 3 dots at top right of your course content page and select Import Content.
3. Select the file. For some files, you may be able to import the zip file. If it fails, try unzipping and locating the .IMSCC file specifically and importing.
4. Blackboard will begin importing.
5. Wait for an email confirmation of the upload or reload the page in a few minutes to see a summary of any errors or issues.
6. Review imported content as you would normally on the Course Content page.
