

# Effective Virtual Communication and Presentations Content Links

## How to use this document

Throughout the H5P interactive books in the course, Effective Virtual Communication and Presentations, there are places where documents can and should be linked for students. This will create a more cohesive and smooth experience for learners.

The relevant documents are saved in the *Effective Virtual Communication and Presentations Course Documents* zip file (available on the VLS Collections site).

You will need to download this zip file, unzip it, and upload the individual files to your Learning Management System (LMS) or document sharing platform of choice (Google, Dropbox, OneDrive, etc.). Once you have done this, you can copy the individual Share links to add to the relevant pages listed below.

Details on [how to reuse the H5P Interactive Books is available on the H5P Website](#). Once you have uploaded the file onto your own H5P account (free through [eCampus Ontario H5P Studio](#)), you can use the "Link" option in the Edit Text area to create hyperlinks for each of these documents.

## Module 1: Introduction - Content Links
