

How Do IP Considerations Impact Your Company?

Seray Çiçek, Co-Founder & CEO, LSK Technologies Inc.

IP was something we had in mind even when we founded the company. It was something we started thinking first, before the company.

We started working on our IP during our master's degree at University of Toronto and that's when we contacted the IP office to learn more about how we can protect our intellectual property. That was kind of our first hit at that.

And after that, we worked with the University of Toronto to get our IP streamlined and filed, and that was our kind of first stick in the ground.

And after that, we have founded the company and we had been actively filing provisional patents, and we actually filed our PCT two months ago.

So it's something we always keep in mind.
