Accessibility of Beginning Japanese I

A prior version of this document contained multiple accessibility issues. *Beginning Japanese for Professionals: Book 1* now meets the criteria outlined below, which is a set of criteria adapted from BCCampus’ [Checklist for Accessibility](#), licensed under [CC BY 4.0](#).

This book contains the following accessibility and usability features:

Multiple File Formats Available

- This book is available in multiple formats: this editable Word document, a PDF (with files for the whole book and individual Lessons), and a [webbook](#) on the Pressbooks platform. Like this Word version, [the PDF is available for free download](#) at Portland State University’s institutional repository, [PDXScholar](#).
- While the Word and PDF versions of this book were created and remediated for accessible and navigable classroom use, the webbook version primarily exists for those interested in editing, building, and/or remixing the material using the Pressbooks platform.

Organization of content

- Content is organized under headings and subheadings, which appear in sequential order and are reflected in the corresponding Table of Contents
- List structures (numbered and unnumbered) are used

Images

- All images contain alternative text
- Images do not rely on color to convey meaning
- Images are in-line with text

Tables

- All tables deemed necessary include header rows and contain captions, alternative text, and cell padding.

- Tables do not include merged or split cells.

Multimedia

- A. All audio files have corresponding transcripts, found either throughout the corresponding exercise or at the end of the corresponding chapter. End-of-chapter transcripts can be found under H2 Drill Tape Script.

Font Size and formatting

- Font size is 12 point or higher for body text
- Font size is 9 point or higher for footnotes, table captions, and hints
- Font color or style does not convey meaning; when text is highlighted, the “emphasis” style in Word has also been applied
- No known repeated characters or excessive spaces

Known Issues/Potential barriers to accessibility

Hints

- As a book of Japanese language learning, this book contains multiple scripts. Throughout the book, where more complex characters or scripts are used, including ones with multiple possible interpretations, hiragana characters appear in smaller font above in the form of a hint. PDXScholar acknowledges that these hints, which appear throughout the document, may be confusing for someone using assistive technologies or navigating the document by keyboard. Please be aware that when accessing the book, you will frequently encounter lines of text with just a few syllables of Japanese hiragana in a smaller font size. The following example appears on page 4, Lesson 0, under H1 Instructor’s Directions. In the first line, the hiragana character “き” lies above the kanji character “聞”:

1. *Kiite kudasai.* き
聞いてください。 Please listen

Lists and Tagging in PDF

- Page 57 and Tables 6, 7, and 15 of the PDF may contain tag issues. Multi-level list structures that appear in the Drill Tape Scripts may not be correctly or consistently tagged in the PDF.

About the Book

This textbook is designed for beginning learners who want to learn basic Japanese for the purpose of living and working in Japan. Unlike textbooks written primarily for students, whose content largely centers on student life, this book focuses more on social and professional life beyond school.

This textbook can be used for self-study, as part of an online course, or as a traditional college course. As a beginning level textbook, this book includes many elementary grammar patterns (Japanese Language Proficiency Test Levels 5 and 4), but the vocabulary and situations are selected specifically for working adults. Explanations are kept concise so as to only cover key points. The main focus is on oral communication.

About the Author

Emiko Konomi received a PhD in Linguistics from Cornell University and has been on the faculty of the School of Business Administration at Portland State University since 2014. Prior to joining SBA, Emiko taught in the Department of World Languages and Literatures at PSU. She also has extensive experience training Japanese language instructors at various teacher-training programs across the country. Currently Emiko teaches all levels of Japanese to students in the Masters of International Management program.

Known for her passionate teaching style and dedication to quality teaching, Emiko received the 2011 and 2015 John Eliot Allen Outstanding Teaching Awards from the College of Liberal Arts and Sciences. Her academic research focuses on Japanese linguistics and pedagogy.

Before We Begin

For whom is this textbook designed?

This textbook is designed for beginning learners who want to learn basic Japanese for the purpose of living and working in Japan. Unlike textbooks written primarily for students, whose content largely centers on student life, this book focuses more on social and professional life beyond school.

This textbook can be used for self-study, as part of an online course, or as a traditional college course. As a beginning level textbook, this book includes many elementary grammar patterns (Japanese Language Proficiency Test Levels 5 and 4), but the vocabulary and situations are selected specifically for working adults. Explanations are kept concise so as to only cover key points. The main focus is on oral communication.

This textbook was originally written for the first term (ten weeks) of the beginning Japanese course in the graduate program of Masters of International Management in the School of Business Administration at Portland State University. The goals of the Japanese courses are to provide students with a foundation for acquiring future business language skills and to increase students' knowledge of Japanese culture. This is the first edition that has been piloted in the program and will be replaced with revised editions in the future.

What kind of things can you do in Japanese after finishing this book?

Based on ILR (Interagency Language Roundtable) estimates, we assume that in order for an English-speaking learner with average language aptitude to achieve the proficiency level of ILR Proficiency Scale 2: Limited Working Competence in Japanese, over one thousand hours of instruction will be required. The MIM program at PSU provides 150 hours of instruction in total. So, what can we expect our students to be able to do at the end of the program? It is not likely that they can negotiate business in Japanese or handle many professional interactions.

However, it is possible that they can handle many everyday interactions, avoid well-known taboos, answer routine questions about themselves, and network for business purposes. The topics to be covered in this textbook are:

- Greetings and Ritual Expressions
- Meeting People and Self-Introductions
- Exchanging Business Cards
- Schedules and Calendar
- Shopping
- Eating and Drinking
- Locations and Directions
- Public Transportations
- Family and My Profile
- Leisure and Hobbies
- Manners and Customs

How is this textbook structured?

This textbook is comprised of ten lessons that follow the introductory *Before We Begin* and Lesson 0 *Greetings and Ritual Expressions* sections. Each lesson consists of four dialogues. Each dialogue is followed by a vocabulary list, grammar notes, drills and exercises. At the end of each lesson, you will find a grammar review and application activities.

How is reading and writing handled in this textbook?

The modern Japanese is written using a combination of *kanji* (characters borrowed from China) along with *hiragana* and *katakana* (two independent systems representing Japanese syllables). While the textbook introduces *hiragana* and *katakana*, no reading or writing instruction is included in this volume.

How is Japanese pronunciation presented in this textbook?

The headphones symbol  indicates that there is an audio recording for the section marked by this symbol. The accompanying audio should be maximally used to learn all the dialogues and vocabulary lists and to practice drills. Keep in mind as you learn how to speak Japanese that you can only learn accurate pronunciation by listening to and mimicking the pronunciation of native speakers. Avoid reading off the written scripts.

When using the audio, make sure you do not refer to the written scripts. For many of us, visual input affects audio processing so much that it may interfere with accurately perceiving the audio input. You should refer to the written scripts only when you need help with particular parts of the audio. After peeking at the script, go back to the audio again.

In the first four lessons in the textbook, Japanese words and sentences are presented in Romanization (Roman alphabet representing Japanese sounds) along with the authentic Japanese script. Romanization is not meant to be an accurate representation of Japanese sounds but rather just a reminder of the sounds you hear when listening to your instructor or the audio recordings. Be particularly mindful not to pronounce Romanized Japanese as if you were reading English or any other language.

Starting in Lesson 5, Japanese words and sentences are presented using the authentic Japanese orthography.

Hiragana will be placed above *kanji* to indicate the correct reading. This use of *kana* is called *furigana* and is common in comic books and other publications where the writer wants to ensure the correct reading of the *kanji* used.

How should you use this textbook?

The dialogues present frequently observed exchanges that are part of a longer conversation. It is practical and useful to memorize these to the point where you can recite them automatically and naturally. As suggested above, make sure you memorize dialogues using the audio and while integrating body language. You can expand each dialogue by adding elements before and after each to create a longer conversation. You can also change parts of the dialogue to fit a different context. Either way, the original dialogue serves as a base to explore other possibilities.

Each dialogue has at least two drills that target key grammar patterns and vocabulary. These are rather mechanical drills that are meant to train quick and automatic formation of language. The recommended procedure for these drill practices is to first listen to the two model exchanges and understand what changes to make in responding to the cues. Look at the scripts for the models if you are not sure what to do. Listen to the first cue, insert your response during the following pause, listen to the model answer, and repeat the model answer during the second pause. Repeat this procedure for the following cues. It is recommended that you loop back to the beginning of the drill frequently. Always give yourself a chance to respond to the cues before you listen to the model answer. Also think of the meaning as you do these drills. Needless to say, it doesn't make sense to just keep repeating the sounds you hear without knowing what you are saying.

Two types of exercises will follow the mechanical drills. The first is 'Say It in Japanese,' which is a translation activity. The last exercise 'Act in Japanese' is a role-play exercise, in which students can freely respond to each other within the given context and expand the suggested interchange into a longer interaction. For this exercise, students are encouraged to perform the roles as naturally as possible integrating body language, facial expressions, etc.

By answering the grammar review questions at the end of each lesson, you will self assess your understanding of the grammar before moving onto the next lesson. The parentheses at the end of each question indicate in which grammar note to find the answer to the question.

For Practical Applications, which concludes each lesson, it is suggested that relevant authentic materials such as restaurant menus, shopping mall directories, apartment listings, etc. are extensively used to accommodate the real-world application of what has been practiced. Students are encouraged to freely and realistically ask and answer questions and exchange comments regarding those materials.

Last but not least...

Make a clear distinction between knowing the material (Fact) and being able to use the material in spontaneous conversations (Act). You may learn grammar quickly, but it takes a great deal of repetitive practice to develop the skills to speak Japanese in real-life situations. At the end of the day, it doesn't mean much if you cannot respond orally to a native speaker in a culturally appropriate way no matter how well you can answer grammar questions or recite vocabulary in isolation. In studying Japanese, always keep in mind the objectives and how best to reach them.

Have fun!

Lesson 0

Instructor's Directions ㇿ

The following sentences are for in-class use by the teacher to provide students with directions. Students do not need to be able to use these; just learn what action is expected. The goal is to avoid using English in the classroom from the very beginning of the course.

<i>Kiite kudasai.</i>	き 聞いてください。	Please listen.
<i>Itte kudasai.</i>	い 言ってください。	Please say it.
<i>Kotaete kudasai.</i>	こた 教えてください。	Please answer.
<i>Mou ichido onegai-shimasu.</i>	いちどねが もう一度お願いします。	One more time, please.
<i>X-san ni itte kudasai.</i>	い Xさんに言ってください。	Please say it to Mr/s. X.

Greetings and Ritual Expressions ㇿ

Common daily greetings and ritual expressions are introduced here. The dialogues below provide sample contexts. A vocabulary list follows each dialogue with some notes. Additional items are marked with +.

It is recommended that rather than memorizing words in isolation, you learn them through the dialogue along with appropriate body language.

First listen to the accompanying audio and practice each line aloud. Add on one line at a time. Stand up where appropriate. Practice alternatives for different contexts.

Greetings

A: <i>Ohayou.</i>	おはよう。	Good morning.
B: <i>Ohayou gozaimasu.</i>	おはようございます。	Good morning.
<i>Ohayou</i>	おはよう	Good morning
<i>Ohayou gozaimasu</i>	おはようございます	Good morning (polite)
+ <i>Konnichiwa</i>	こんにちは	Hello
+ <i>Konbanwa</i>	んばんは	Good evening

Gozaimasu indicates politeness and formality. People who know each other well (family members, good friends) can use the short form. You should never use the short form with your superiors (teacher, boss, supervisor). *Konnichiwa* and *konbanwa* cover both formal and informal situations.

Offering and Accepting, Thanking

A: <i>Douzo</i>	どうぞ。	Go ahead. (Please take it)
B: <i>Aa, doumo.</i>	ああ、どうも。	Oh, thanks.
<i>douzo</i>	どうぞ	go ahead, by all means
<i>a(a) あ (あ)</i>	oh, ah	
<i>doumo</i>	どうも	thank you, I'm sorry
+ <i>arigatou</i>	ありがとう	thank you
+ <i>arigatou gozaimasu</i>	ありがとうございます	thank you (polite)
+ <i>arigatou gozaimashita.</i>	ありがとうございました	thank you for what you've done

Douzo is used to offer things or invite people to go ahead.

Arigatou (*gozaimasu*) expresses thanks in general. You should never use the short form with your superiors (teacher, boss, supervisor). *Doumo* expresses gratitude or apology. It can also be combined with *arigatou gozaimasu* ('Thank you very much') or *sumimasen* ('I'm very sorry'). *Gozaimashita* indicates past and is used when the act is completed.

Addressing Someone

A: <i>Honda-san.</i>	ほんだ 本田さん。	Mr/s. Honda.
B: <i>Hai.</i>	はい。	Yes.
<i>~san~</i>	さん	Mr/s. X
<i>hai</i>	はい	yes (that's right), here you go
+ <i>~sensei</i>	せんせい X先生	Prof./Dr. X

~san is a title that can be attached to a given name, a family name, and even some roles. Don't attach it to your own name or the names of people in your group when talking to outsiders.

~sensei is a title that can be attached to teachers, professors, doctors, etc. You should not use *~san* to refer to your teacher.

Hai means 'that's right,' 'present' (in roll call), or 'here you are' (handing something over).

Apologizing

A: <i>A, sumimasen.</i>	あ、すみません！	Oh, sorry!
B: <i>Ie, ie.</i>	いえ、いえ。	No, no.
<i>sumimasen</i>	すみません	thank you, I'm sorry
<i>ie, iie</i> (formal), <i>iya</i> (casual)	いいえ／いえ／いや	no, that's wrong
+ <i>sumimasen deshita</i>	すみませんでした	thank you, I'm sorry for what's done
+ <i>gomen</i>	ごめん	sorry, excuse me (casual)
+ <i>gomen nasai</i>	ごめんなさい	sorry, excuse me (casual, gentle)
+ <i>dou itashimashite</i>	どういたしまして	you're welcome, not at all

Sumimasen expresses apology or gratitude when you are about to trouble or have troubled someone. *Sumimasen deshita* expresses apology or gratitude when you have troubled someone.

Starting and Ending Eating/Drinking

A: <i>Douzo.</i>	どうぞ。	Please (have some.)
B: <i>Jaa, itadakimasu.</i>	じゃあ、いただきます。	Well, then I'll have some.

Gochisou sama deshita. ごちそうさまでした。Thank you (That was delicious).

<i>jaa, ja</i>	じゃあ／じゃ	well then, if so
<i>itadakimasu</i>	いただきます	ritual expression before eating
<i>gochisou-sama</i>	ごちそうさま	ritual expression after eating
<i>gochisou-sama deshita</i>	ごちそうさまでした	formal version of <i>gochisou-sama</i>

Ja is used to follow up on what has been said, to switch topic, etc. *Itadakimasu* literally means 'I'll humbly accept it' and is used before eating or receiving a gift. *Gochisousama* (*deshita*) shows gratitude for the food or drink one has been offered. Even when alone Japanese people tend to whisper *itadakimasu* and *gochisousama* to start and end eating.

Requesting

A : <i>Sumimasen.</i>	すみません。	Excuse me.
<i>Onegaishimasu.</i>	<small>ねが</small> お願いします。	Can you give that to me.
B : <i>Hai, douzo.</i>	はい、どうぞ。	Sure, here you go.

ねが

<i>Onegai-shimasu</i>	願います	please help me, do me a favor
-----------------------	------	-------------------------------

Entering a Room (Knock on the door TWICE)

A : <i>Shitsurei-shimasu.</i>	失礼します。	Excuse me.
B : <i>Hai, douzo.</i>	はい、どうぞ。	Yes, come in.
<i>shitsurei-shimasu</i>	失礼します	excuse me
+ <i>shitsurei-shimashita</i>	失礼しました	excuse me for what I've done

Shitsurei-shimasu literally means 'I'm going to do something rude' and is used when entering a room, interrupting, or leaving. *Shitsurei-shimashita* is used for what you've done.

Leaving and Coming Back to Home /Office

A : <i>Itte kimasu.</i>	いってきます。	See you later.
B : <i>Itte rasshai.</i>	いってらっしゃい。	See you later.
A : <i>Tadaima.</i>	ただいま。	I'm home.
B : <i>Okaerinasai.</i>	おかえりなさい。	Welcome back.
<i>itte kimasu</i>	いってきます	ritual expression when leaving home
<i>itte rasshai</i>	いってらっしゃい	ritual response to <i>Itte kimasu</i>
<i>tadaima</i>	ただいま	ritual expression upon coming home
<i>okaerinasai</i>	お帰りなさい	ritual response to <i>Tadaima</i>

Itte kimasu is used when leaving home or stepping out the office for an errand. It implies that you are coming back.

Meeting People for the First Time

A: <i>Hajimemashite.</i>	はじめまして。	How do you do.
	ほんだ	
Honda desu.	本田です。	I'm Honda.
	ほんだ	
B: Honda-san desu ka	本田さんですか。	You're Mr. Honda?
<i>Sumisu desu</i>	スミスです。	I'm Smith.
<i>Douzo yoroshiku.</i>	どうぞよろしく。	Nice to meet you.

<i>Hajimemashite</i>	はじめまして	How do you do?
<i>~desu</i>	X です	it is/I'm/you're/they are X, etc.
<i>~desu ka</i>	X ですか	is it/am I/are you/are they X? etc.
<i>yoroshiku</i>	よろしく	ritual expression when meeting someone, when needing a favor
<i>yoroshiku onegai-shimasu</i>	よろしく ^{ねが} お願いします	please treat me favorably, thank you in advance

Hajimemashite literally means 'for the first time.' It is a ritual expression used in first meeting people. You can respond with your own *hajimemashite* or *douzo yoroshiku onegai-shimasu*. **Make sure you bow.**

After a person tells you their name, confirm it by asking *X-san desu ka*. Repetition may seem unnecessary, but it's customary to do so during introductions.

Taking Leave

A : <i>Ja, shitsurei-shimasu.</i>	じゃ、失礼 ^{しつれい} します。	Well then, I'll go (excuse me).
B : <i>Aa, otsukare-sama deshita.</i>	ああ、お疲れ ^{つか} さまでした。	Ah, thanks for the good work.
<i>otuskare(-sama)</i>	おつかれ (さま)	thanks for your work, you must be tired
<i>otsukare-sama desu</i>	おつかれさまです	(formal) (on going)
<i>otuskare-sama deshita</i>	おつかれさまでした	(the work is over)

The above are common greetings between co-workers. They are also used to thank service personnel or acknowledge anyone's hard work.

Parting

A: <i>Ja, mata.</i>	じゃ、また。	Well, see you.
B: <i>Sayonara</i>	さよなら。	Good-bye.
<i>ja, mata</i>	じゃ、また	see you later (informal)
<i>sayonara/sayounara</i>	さよなら／さようなら	Good-bye.

Retiring at Night

A: <i>Ja, oyasumi</i>	じゃ、おやすみ。
B: <i>Aa, oyasuminasai</i>	ああ、おやすみなさい。

oyasumi
oyasumi nasai

おやすみ
おやすみなさい

Notes on Pronunciation

Syllables

Japanese syllables are constructed in the following four ways.

- a vowel (*a, i, u, e, o*)
- a consonant + a vowel (62 combinations)
- a consonant alone (*n, t, s, k, p*)
- a consonant + y + a vowel (33 combinations)

The chart below shows all the syllables in Japanese.

Table 1. Syllables in Japanese

	<i>k</i>	<i>g</i>	<i>s</i>	<i>z</i>	<i>t</i>	<i>d</i>	<i>n</i>	<i>h</i>	<i>p</i>	<i>b</i>	<i>m</i>	<i>y</i>	<i>r</i>	<i>w</i>

	<i>kyo</i>	<i>gyo</i>	<i>sho</i>	<i>jo</i>	<i>cho</i>		<i>nyo</i>	<i>hyo</i>	<i>pyo</i>	<i>byo</i>	<i>myo</i>		<i>ryo</i>	

Note the following special cases marked with emphasis in the chart:

- /s+i/ is pronounced /shi/
- /z+i/ is pronounced /ji/
- /t+i/ is pronounced /chi/
- /t+u/ is pronounced /tsu/
- /d+i/ is pronounced /ji/
- /d+u/ is pronounced /zu/

Long Vowels

There are five long vowels in Japanese: /aa/, /ii/, /uu/, /ee/, and /oo/. They are “long” in terms of spoken duration. In the writing system, the long versions of /a/, /i/, and /u/ are recognized as the same sound: /aa/, /ii/, /uu/. But the long version of /o/ (with certain exceptions) is represented by /ou/ and the long version of /e/ (with certain exceptions) is written as /ei/.

Long Consonants

The consonants /t/, /s/, /k/, and /p/ can be long. When these consonants constitute an entire syllable without a vowel, they are not pronounced but take a full syllable length.

- 6 syllables: *i-t-te ki-ma-su* ‘I’m leaving.’
- 3 syllables: *I-p-pon* ‘one long thing’
- 3 syllables: *I-k-ko* ‘one round thing’
- 3 syllables: *i-s-sho* ‘together’

The consonant /n/ can take up an entire syllable by itself, as in *konnichiwa* ‘hello’ (5 syllables: *ko-n-ni-chi-wa*).

Pitch Accent

As you listen to Japanese, you will notice rises and falls in pitch. Pitch can change from syllable to syllable in order to distinguish meaning. For example, there is a fall in pitch in *hai* ‘yes’, while there is a rise in *hai* ‘ash’. The difference in pitch pattern distinguishes these two words. This is called pitch accent.

HAi ‘yes’
hai ‘ash’ (The high pitch is indicated by the capital and emphasis.)

On the other hand, in English a difference in loudness serves this function. This is called stress accent. Compare the following.

*IN*sult (noun)
 in*SULT* (verb) (The loud syllable is indicated by the capital

and emphasis.) All Japanese words have one

of the following pitch patterns:

Fall: *JAa* ‘well then’
DOumo ‘thanks’
DOuzo ‘go ahead’

Rise:	<i>iIE</i>	‘no’
	<i>saYONARA</i>	‘good bye’
	<i>taDAIMA</i>	‘I’m home’
	<i>oHAYOU</i>	‘good morning’
	<i>yoROSHIKU</i>	‘Nice to meet you’
Rise and Fall:		
	<i>aRIgatou</i>	‘thanks’
	<i>shiTSUrei-shimasu</i>	‘Excuse me’
	<i>suMIMASEn</i>	‘Sorry’

If a word has only one syllable, a fall or a rise occurs with the following word.

HA desu. ‘It’s a
tooth.’ *ha DEsu.*
‘It’s a leaf.’

A note on the cultural significance of pitch is in order. As you learn Japanese, pay attention to pitch at the sentence level as well as the word level. A slight change in pitch may indicate a subtle but significant change in meaning or mood. It is observed in many, if not all, languages that speakers tend to raise their pitch when talking to babies or when trying to sound gentle. Japanese is no exception in this regard. Talking in a high pitch is generally associated with politeness in Japanese. Women tend to talk in a higher pitch, but regardless of the gender, sales and customer service personnel, receptionists, waiters, etc. speak in overall higher pitch. Remember that when something is the norm and expected in a culture and you don’t follow it, you may be sending a certain message inadvertently. Just to be safe, bow, smile, and talk gently.

Grammar Notes

1-1-1 Verbs, Non-Past, Formal, Affirmative and Negative

Verbs occur at the end of a sentence in Japanese. A lone verb can comprise a complete sentence. Unlike English, where a subject is required, the subject and object are usually not mentioned in Japanese if they are understood from the context. So, in the dialogue above, Mr. Smith simply says *Wakarimasu ka* in order to find out if a coworker understands the report. He does not mention ‘you’ or ‘the report’, which are obvious from the context.

A Japanese verb ends in *-masu* (Affirmative, Non-Past, Formal) and *-masen* (Negative, Non-Past, Formal) as well as other forms, which will be introduced later.

Non-past refers to an act that is performed regularly or will be performed in the future. It does NOT refer to an act that is currently being performed.

Formal refers to speaking courteously. This form is used typically when speaking to superiors, people you meet for the first time, or strangers. It is a safer form to use when learners first start speaking Japanese.

1-1-2 *Hai* and *Iie*: Affirming and Negating

Hai means ‘what you said is right’ regardless of whether the sentence is affirmative or negative. *Ee* is a less formal than *hai*.

<i>Wakarimasu ka.</i>	Do you get [it]?
<i>Hai, wakarimasu.</i>	Yes, I do.

<i>Wakarimasen ka.</i>	You don’t get [it]?
<i>Ee, sumimasen.</i>	That’s right. I’m sorry.

Iie means ‘what you said is incorrect’ regardless of whether the sentence is affirmative or negative. *Iya* is less formal than *iie*.

<i>Wakarimasu ka.</i>	Do you get [it]?
<i>Iie, wakarimasen.</i>	No, I don’t.

<i>Wakarimasen ne.</i>	You don’t get [it], right?
<i>Iya, wakarimasu yo.</i>	No, (that’s wrong) I do get it.

1-1-3 Sentence Particles *Ka* and *Ne(e)*

Sentence particles such as *ka* and *ne(e)* attach to a sentence. *Ka* is a question marker.

<i>Tabemasu.</i>	I eat it.
<i>Tabemasu ka.</i>	Do you eat it?

Ne(e) with falling intonation indicates that you assume the addressee shares your feelings. It helps create the culturally important impression that you and the addressee share the same feeling or opinion. When used with a question intonation, you are checking if your

assumption is in fact correct.

<i>Yoku nomimasu nee.</i>	You drink a lot, don't you!
<i>Wakarimasen nee.</i>	We don't know, do we.
<i>Tabemasen ne?</i>	You don't eat it, right?

1-1-4 Adverbs

Adverbs appear before the verb in a Japanese sentence and indicate how much, how often, or in what manner something happens. *Amari* and *zenzen* combine with a negative and indicate the degree to which something happens. (*Zenzen* combined with an affirmative indicates an unexpected degree in colloquial Japanese)

<i>Amari tabemasen.</i>	I don't eat it very much.
<i>Zenzen hanashimasen.</i>	I do not speak it at all.

Yoku means 'well, a lot, or frequently' depending on the context.

<i>Yoku wakarimasu.</i>	I understand well.
<i>Yoku kaimasu.</i>	I buy it a lot/often.

Grammar Notes

1-2-1 Noun + Verb

As seen in Dialogue 1 above, subject, object and other elements are usually not explicitly mentioned in Japanese when they are clear from the context. But when not clear, you can place them before the verb.

Are, tabemasu ka.

Do you eat that?

Kore, zenzen wakarimasen.

I don't understand this at all.

Nouns can relate to sentence verbs in a variety of ways.

Subject *Honda-san nomimasu ka.*

Does Ms. Honda drink?

Object *Kore tsukaimasu ne.*

We're going to use this, right?

More categories will be introduced later.

More than one of these can appear in a sentence. The common word order is:

Time--Subject--Object--Adverb--Verb

Watashi kore yoku wakarimasu.

I understand this well.

However, while the verb needs to appear at the end, noun order is relatively flexible. When sentence elements are not in the common order above, the element moved forward has more focus.

Kore, watashi yoku wakarimasu

This, I understand well.

1-2-2 *Ko-so-a-do* series

When referring to things in English, a two-way distinction between *this* (close to the speaker) and *that* (away from the speaker) is made. In Japanese, a three-way distinction is made:

kore this thing (close to me) or this thing I just mentioned

sore that thing (close to you) or that thing which was just mentioned

are that thing (away from both of us) or that thing we both know about

dore which one

This is the first set of expressions based on the *ko-so-a-do* distinction. There are more sets that are based on the same distinction. We refer to that group as the Ko-so-a-do series, which includes expressions such as ‘X kind’, ‘X way’, ‘X place’, etc. These will be introduced later.

1-2-3 Clause Particle *Kedo*

Kedo ‘but’ connects two sentences to make one. The two sentences typically contain contrasting ideas but sometimes the first sentence simply serves as an introduction and prepares the listener for the second sentence.

Kore wa kaimasu kedo, are wa kaimasen. I’ll buy this, but I won’t buy that.
Sumimasen kedo, wakarimasen. I’m sorry but I don’t understand.
Honda desu kedo, shiturei-shimasu. I’m Honda. Excuse me. (entering a room)

The second sentence is often left unexpressed because it is clear from the context or because the speaker hesitates to mention it for some reason. In the dialogue above, Mr. Smith probably wanted to sound less abrupt and is inviting comments from the other speakers.

Kaimasu kedo... I’ll buy it but ... (Is it okay with you? / Why did you ask?)

Ga is more formal than *kedo* and is more common in writing and formal speeches. There are also several variations of *kedo* such as *keredo*, *kedomo*, and *keredomo*, which are more formal than *kedo*.

1-2-4 Particle *Wa* indicating Contrast

Particle *wa* follows nouns and indicates a contrast between that noun under discussion and other possibilities. The noun can be subject, object, or some other category.

Watashi wa mimasu kedo... I watch it, but...(someone else may not)
Kore wa wakarimasu. I understand this (but not the other one)
Ashita wa kaimasu. Tomorrow, I will buy it (but not today)

When particle *wa* attaches to a noun with a question intonation, it means ‘how about X?’ as in the dialogue above. In answering this type of question, make sure you do not reply “yes” or “no”, since it’s not a yes-no question.

1-2-5 Particle *Mo* indicating Addition

The particle *mo* performs the opposite function of that performed by the particle *wa*. The particle *mo* means ‘too’ or ‘also’ with an affirmative verb and ‘(n)either’ with a negative verb. It can attach to a subject, object or time, among others.

Honda-san mo mimasu. Ms. Honda watches it, too (as well as someone else)

Kore mo wakarimasen. I don't understand this, either (in addition to something else)
Ashita mo kaimasu. Tomorrow, I will buy it, too (as well as some other time)

Grammar Notes

1-3-1 Negative Questions as Suggestions

Negative questions are sometimes used to suggest or invite to do certain actions.

<i>Tabemasen ka</i>	Won't you have some? or Why don't we eat?
<i>Ikimasen ka.</i>	Won't you go? or Shall we go?

When accepting the invitation, it's polite to say *Doumo* or *Arigatou gozaimasu*.

When turning down the invitation, avoid saying no directly. It's best to instead leave things ambiguous by saying *chotto* and sound hesitant by speaking slowly and elongating vowels.

<i>Kore tabemasen ka.</i>	Would you like to have some?
Accepting:	<i>Arigatou gozaimasu. Ja, chotto itadakimasu.</i> Thank you. I'll have a little, then.
Turning down:	<i>Iyaa, chottooo... Well...just ...</i>

1-3-2 *Chotto*: Impact Softener

Chotto literally means 'a little'. However, it is often used as an impact softener during a conversation when less-than favorable information is presented. For example, as explained in GN 1-3-1, it's polite to just say *chotto* when rejecting an invitation or request, rather than saying no. The efforts to avoid an unpleasant or awkward situation is evidenced in the frequent use of *chotto* in Japanese communication. Here are some examples.

- To get attention from others
- To be humble:
 - When accepting something offered:
Ja, chotto itadakimasu. Then, I'll take just a little.
 - When asked if you know something well:
Chotto wakarimasu kedo... I understand a little, but...
- To soften impact:
 - When making a request
Suimasen. Chotto onegai-shimasu. Excuse me. Can I just ask a favor?
 - When you do not know the answer to a question:
Chotto wakarimasen nee. I just do not know.
 - When you suggest taking a break, regardless of the actual length of the break:
Chotto, yasumimasen ka? Shall we take a short break?

1-3-3 *Aizuchi*: How to be a Good Listener

When you participate in a Japanese conversation you are expected to give frequent feedback and show that you are engaged. Feedback includes nodding, making facial expressions, and using short expressions such as *hai*, *soo desu ka*, *aa* and others. All these are called *Aizuchi*.

You probably hear Japanese speakers use the sentence particle *nee* frequently and see them nodding equally frequently. Nodding means ‘I’m listening’, but not necessarily means ‘I agree.’ So, don’t just stare and listen with a poker face. Nod, smile, and say, *Aa, soo desu ka.*

1-3-4 Personal References

Watashi ‘I’ is the most common reference to oneself in Japanese, which is probably the safest form to use for beginning learners. *Boku* is only used by male speakers, and less formal than *watashi*. Other forms will be introduced later, which have different shades of formality and other elements, and thus require more care in using them.

Unlike English, where the pronoun *you* is used for the addressee in most cases, there are many ways to address and refer to others in Japanese. To decide how to call a person in Japanese, you need to consider your relationship with the person and the circumstances. Last name + *san* is most common, but *sensei* ‘teacher’ and other titles are required to address and refer to people in such positions. Using *-san* instead of the titles can be rude. First name with or without *-san* is more informal and used among friends or to those in the subordinate positions. Be extra careful with the word *anata* ‘you’. Unlike its English equivalent, *anata* has very limited use, usually for anonymous addressees, and is inappropriate if you know the person’s name or title.

When deciding how to call a person, be conservative. Start with last name + *san* or a title such as *sensei*. Switch to more casual alternatives when requested. Be careful about timing. A switch is usually initiated by the superior.

Another caution is to not overuse *watashi* or any personal reference for that matter. Recall that the subject is not mentioned in Japanese when clearly understood from the context. Overuse of personal reference is one of the most common errors made by foreigners whose native language requires them in a sentence.

1-3-5 Sentence Particle *Yo* Indicating New Information

Unlike the particle *ne(e)*, which indicates the shared information, the particle *yo* indicates that the speaker thinks this is new information to the listener. So, it is often used to correct or assure someone. In the dialogue above, Mr. Yamada tries to assure Ms. Honda that he is going by using this particle at the end.

Needless to say, when correcting someone, you need to first make sure that you are in a position to do so, and then do it appropriately.

Past	<i>-mashita</i>	<i>-masen deshita</i>

1-4-2 Compound Verbs

/Noun + *shimasu* / combinations are compound verbs. Many nouns that mean actions such as *renshuu* ‘practice’ and *benkyou* ‘study’ appear in this pattern. When verbs in English are borrowed into Japanese, *-shimasu* is attached to them and they become Japanese verbs. Make sure you pronounce them in the Japanese way.

Meeru-shimasu yo. I’ll email (or text) you.

Getto-shimasu. I’ll get it/I’ll obtain it.

Appuroodo-shimasu. I’ll upload it.

Will you buy it?

Response: *Ee, chotto kaimasenka.*

Yes, why don’t we buy a little?

B. ☞

Cue: *Yasumimashita ne.*

You were absent, right?

Response: *Kinou wa yasumimashita kedo, ototoi wa yasumimasen deshita.*

I was absent yesterday, but I wasn’t the day before yesterday

Cue: *Ikimashita ne.*

You went, right?

Response: *Kinou wa ikimashita kedo, ototoi wa ikimasen deshita.*

I went yesterday, but I didn’t the day before yesterday.

C. Say it in Japanese.

You’ve been asked about your plan for this weekend.

1. I’ll study.

2. Why don't we talk tomorrow?
3. I emailed you yesterday. Didn't you read it?
4. I don't know, but why don't we go out?
5. I'll just take a break, but how about you, Mr. Yamada?

D. Act in Japanese.

Grammar Notes

2-1-1/Noun + *desu* / 'is N' / Noun + *ja nai desu* / 'is not N'

/X desu/ means 'is X' (Affirmative) and */X ja nai desu/* means 'is not X' (Negative). These noun sentences are Non-Past and Formal.

Ame desu yo. It's raining.

Kore wa gakkou desu ka. Is this a school?

Honda-san ja nai desu ka? Aren't you Ms. Honda?

A negative question can be also used 1) to show some uncertainty, and

2) to politely correct someone.

1) *Ima, na-ji desu ka.* - What time is it?
Yo-ji ja nai desu ka? - Isn't it four?

2) *San-ji desu yo.* - It's three.
Anou, yo-ji ja nai desu ka. - Umm, isn't it four?

Recall that what is obvious from the context is usually not mentioned in Japanese. In the dialogue above, Ms. Tanaka sees Michael going somewhere, and checks if he is going to work. All she has to say is 'Is it work (that you are going to)?'

A sentence *X wa Y desu* is usually translated as 'X is Y'. However, unlike the English translation, where X equals Y (Y is the identity of X), the interpretation of the Japanese sentence is more open and flexible. Consider the following:

Honda-san wa shigoto desu.

This sentence does not mean 'Ms. Honda IS work', but rather for Ms. Honda what is under discussion is the work. So, there are numerous possible interpretations depending on the context. For example, she is at work, her priority is her work, her plan for the weekend is to work, what she likes is her job, to list a few. So, be aware of the context and be imaginative. Now, test your imagination. What can the following possibly mean?

Honda-san wa Panda desu.

2-1-2 Clock Time

Hours are named by attaching *-ji* to the number. Minutes will be introduced later. You can attach *-han* to the hour to mean 'half past the hour'. Note that, unlike English, when asking what time it is, *ima* 'now' is commonly used in Japanese, as shown in the dialogue above.

2-1-3 Hesitation Noises: *Anou* and *Etto*

Hesitation noises are very common in Japanese conversations. Without them, a conversation may sound too mechanical and abrupt. Japanese conversations tend to favor less direct and less confrontational exchanges. 'Beating around the bush' may not be such a bad thing when speaking Japanese. One way to do it is to use hesitation noises. A lot of them!

Anou and *etto* are two of the most common hesitation noises in Japanese. *Anou* is the all mighty hesitation noise while *etto* indicates that you are searching for the right answer. So, when asked what your name is, for example, *anou* is fine, but not *etto*. *Anou* is also used to get attention from a person, but not *etto*.

Besides the hesitation noises, you also hear Japanese speakers elongating the last vowel of each word, or inserting *desu ne* between chunks of words to slow down speech.

Imaaa, anoou, Honda-san waaaa, shigotooo desu. Honda is at work now.
Ashita desu ne, anoo desu ne zenbu desu ne tsukurimasu. I'll make all tomorrow.

Drills and Exercises

A.

Cue: *Ima ku-ji desu ka.*
 Response: *Iya, juu-ji desu yo.*
 Cue: *Ima san-ji desu ka.*
 Response: *Iya, yo-ji desu yo.*

Is it nine o'clock?
 No, it's ten.
 Is it three o'clock?
 No, it's four.

Cue: *Kyou wa baito desu ka.*
 Response: *Ie, baito ja nai desu.*
 Cue: *Kyou wa ame desu ka.*
 Response: *Ie, ame ja nai desu.*

Are you working today?
 No, I'm not.
 Is it raining today?
 No, it isn't.

B. Say it in Japanese.

You are heading out in the morning. Mrs. Yamamoto asks you if you are going to work. Reply.

1. Yes, I'm going to the office (company). Excuse me. What time is it?
2. No, today is my day off. I'm going shopping.
3. No, I'm not going to work today. I'm just going out.
4. Yes, I'm going to work (side job). I'm not returning today. I'll be back the day after tomorrow. See you later.
5. No, I'm just taking a little walk. It's a beautiful day! Wont' you come, too?

C. Act in Japanese.

1. Greet a neighbor in the morning. Mention how cold it is. Ask if it's going to snow tomorrow.
2. Ms. Honda is heading out. Check if she is going shopping. Warn her that it will rain today.
3. You've been asked if it's your day off today. Tell Ms. Yamamoto that yes, it is, but you'll study.
4. A supervisor is looking for Mr. Yamada. Let her know that he is absent today, but will come tomorrow.
5. Someone has mistaken you for Mr/s. Smith. Correct him. Use hesitation noises to avoid bluntness.
6. You've been invited to join a neighborhood soccer team. Find out what time practice is scheduled everyday.
7. You found an error in the schedule. Politely point out that this is not 3:00 and should be 3:30.

Grammar Notes

2-2-1 Noun *no* Noun

When one noun describes another in Japanese they are connected together by particle *no*. /X no Y/ means a kind of Y, which is described by X. Multiple nouns can be connected by particle *no*, but always the last noun is the main noun. Compare the following:

<i>pasokon no kaisya</i>	a computer company
<i>kaisya no pasokon</i>	a computer in the company
<i>America no pasokon no kaisya</i>	a computer company in the US
<i>America no kaisya no pasokon</i>	a computer (made by) an American company

The relationship between the main noun and other noun(s) varies greatly depending on their meaning. The following are some examples.

Location	<i>Nihon no daigaku</i>	colleges in Japan
Affiliation	<i>J-Netto no Maikeru</i>	Michael from J-Net

Possession	<i>watashi no baggu</i>	my bag
Time	<i>san-ji no baito</i>	work from 3 o'clock
Subgroup	<i>Amerika no Pootorando</i>	Portland, US,
	<i>daigakuin no ichi-nensei</i>	First year graduate student
Status	<i>ryuugakusei no Hiru-san</i>	Mr/s. Hill, an exchange student

2-2-2 Loan Words

Japanese has borrowed words and phrases from other languages. The majority of Japanese loanwords these days come from English. When words are borrowed, they go through some changes. First, their pronunciation changes to fit the Japanese sound system. Make sure you learn how your name is pronounced in Japanese. Second, these words usually become nouns, regardless of what they were in their original language.

Third, their meaning in Japanese may be different.

As explained in GN1-4-2, by attaching *-simasu*, many borrowed words that are verbs in the original language can be used as verbs in Japanese (*kopii-shimasu* 'copy'). If the original words/phrases are long, they get abbreviated and become very different words from the original (*sumaho* for smart phone). It's common to abbreviate two-word phrases by taking the first two syllables from each and combine them to make four syllable words (*pasokon* for personal computer).

2-2-3 Introductions and Exchange of Business Cards

It's customary in business situations to exchange business cards when meeting someone for the first time. Keep your cards ready. As you present your card (with both hands, palms up), bow and turn it so that the other person can read it. As you receive the other person's card, take a moment to read/acknowledge it. You can place their business cards in front of you during the meeting to refer to.

Self-introductions are very common in Japan, during which a person gets up in front of a group and explains who he/she is. These follow a formula, which starts with *hajimemashite*, followed by your name (even if it has already been mentioned) and other information, and closes with *douzo yoroshiku onegai shimasu*.

Remember to bow as you introduce yourself, and nod when others bow. It's better to be safe and bow more often than sorry by bowing too little. When in doubt, bow!

2-3-1 Echo Questions

As we have seen, it's common for things that are clear from the context to be left unsaid in Japanese conversation. However, the context may not always be clear to everyone involved. In such cases, people use echo questions (echoing back all or part of what has just been said) for clarification. In the dialogue above, the staff member uses the echo question 'Do you mean this?' to check if Michael is referring to the handouts near her.

Michael: *Sore, nan desu ka.*

What is that?

Staff: *Kore desu ka. Kyou no sukejuuru desu.*

This? It's today's schedule.

While echo questions are not unique to Japanese, they occur a lot more

frequently in Japanese conversations. This is because echo questions are not only used for clarification, but also to slow down the pace of conversation or soften the tone. Recall that hesitation noises are used to take time and avoid direct responses. Echo questions are often used for similar purposes. So, even when there is no need for clarification, Japanese speakers may ask echo questions. In such cases, an answer to the echo question is not necessarily expected.

The most common echo questions are those that repeat the topic nouns, which may have been left unsaid or which are typically marked by the particle *wa* in the other person's speech.

<i>Wakarimasu ka?</i>	Do [you] understand?
- <i>Watashi desu ka. Iya, amari...</i>	Do you mean me? Not really.
<i>Kore wa sumaho desu ka.</i>	Is this a smartphone?
- <i>Kore desu ka. Hai.</i>	Do you mean this? Yes.

Note here that 'Sumaho desu ka.' is impossible as an echo question. Watch out!

*-*Sumaho desu ka? Hai.* Do you mean a smartphone? Yes.

2-3-2 *Ano X Ko-so-a-do series #2*

In Lesson 1, the first set of *ko-so-a-do* series (*kore, sore, are, dore*) was introduced. The second set of the series is *kono, sono, ano, and dono*. Both sets are based on the same *ko-so-a-do* distinction (near the speaker, close to the addressee, or away from both).

The difference between the two sets is that the first is a set of nouns and the second is a set of incomplete elements that require a following noun and cannot be used alone. So, while *kore* is an independent noun meaning 'this', *kono* is linked to a noun, meaning 'this X'. Note that when translated into English, both *kore* and *kono* are translated as 'this'.

<i>kore</i>	this
<i>kono kaisha</i>	this company
<i>kono nihon no kaisyā</i>	this Japanese company

Grammar Notes

2-4-1 Days of the Week

Youbi indicates days of the week. There are three variations for each day of the week.

getsu, getsu-you, getsu-youbi

The longer, the more formal. Abbreviations like the following are also very common.

Getsu-sui-kin Mon-Wed-Fri
Kaa-moku Tue-Thurs.
Do-nichi Sat-Sun

The question word *nan-youbi* ‘what day of the week’ cannot be used to ask ‘what day of the month’, which will be introduced later.

2-4-2 Noun to Noun

/X to Y/ means ‘X and Y’. Unlike English ‘and’, which can connect various elements including adjectives, verbs, or sentences, the particle *to* can only connect nouns or noun phrases.

Nihon to America Japan and America
Asia Ginkou no Oda-san to J-Netto no Sumisu-san
 Mr. Oda from Asia Bank and Mr. Smith from
J-Net Kayoubi to mokuyoubi no jugyou Classes on Tuesday and
 Thursday *Kono nihongo no kyokasho to ano hon* this Japanese textbook
 and that book

Like other particles, *to* follows a noun, and when pronouncing, there is no pause between the noun and *to* (in English, you can pause before ‘and.’) There is no limit to the number of nouns connected, but it’s rare for an adult speaker to list more than three or four.

2-4-3 The Past Form of */X desu/* X *deshita*, X *ja nakatta desu*

The forms of */X desu/* including the Non-Past, Past, Affirmative and Negative are shown in the chart below. Make sure you do not use *deshita* in the Past Negative form.

Table 3. Conjugation of non-past and past-forms of *-desu* in the affirmative and negative.

	Affirmative	Negative
Non-past	<i>Nihongo desu.</i> It’s Japanese.	<i>Nihongo ja nai desu.</i> It’s not Japanese.
Past	<i>Nihongo deshita.</i> It was Japanese.	<i>Nihongo ja nakatta desu.</i> It wasn’t Japanese.

The Past forms are also used to express recollection of information, even when it is information about an event scheduled in the future.

<i>Kaigi wa ashita deshita ne.</i>	The meeting was tomorrow, right?
<i>-Iya, asatte ja nakatta desu ka?</i>	No, wasn't it the day after tomorrow?

Grammar Notes

3-1-1 Adjective Sentences

All adjectives in Japanese end in *-i* (Non Past), *-katta* (Past), and *-*

ku. takai expensive

takaku nai not expensive

To make the Past form, change *-i* to *-katta*. For the negative form, change *nai* to *nakatta*.

takakatta was expensive

takaku nakatta was not expensive

To make a formal style adjective sentence, add *desu*.

Takai desu. It's expensive.

Takaku nai des. It's not

expensive. *Takakatta desu.* It was

expensive. *Takaku nakatta desu.* It

was not expensive.

In Lessons 1 and 2 verb sentences and noun sentences were introduced. With the adjective sentences introduced in this lesson you have now seen all three Japanese sentence types. The chart below shows the forms that have been introduced so far.

Table 4. Examples of affirmative and negative non-past types of verb, noun, and adjective sentences in Japanese.

	Non-past – Affirmative	Non-Past – Negative
Verb Sentence	<i>Wakarimasu.</i>	<i>Wakarimasen.</i>
Noun Sentence	<i>Nihon desu.</i>	<i>Nihon ja nai desu.</i>
Adjective Sentence	<i>Takai desu.</i>	<i>Takaku nai desu.</i>

Table 5. Affirmative and negative past types of verb, noun, and adjective sentences in Japanese.

Past - Affirmative	Past - Negative	Past - Affirmative
Verb Sentence	<i>Wakarimashita.</i>	<i>Wakarimasen deshita.</i>
Noun Sentence	<i>Nihon deshita.</i>	<i>Nihon ja nakatta desu.</i>
Adjective Sentence	<i>Takakatta desu.</i>	<i>Takaku nakatta desu.</i>

The adjective *ii* has special forms. This is the only exception in the entire class of adjectives.

<i>Ii desu</i>	It's good
<i>Yoku nai desu</i>	It's not good
<i>Yokatta desu</i>	It was good.
<i>Yoku nakatta desu.</i>	It wasn't good.

Yoku is one of the most commonly used adverbs and was already introduced in Lesson 1 as in *yoku wakarimasu*, *yoku tabemasu*, etc. *Yokatta desu nee* is a common response to good news.

3-1-2 Adjective + Noun

In Lesson 2, you saw two ways of extending a noun into a noun phrase. One way is to modify a noun by another, as in the sequence /X no Y/ in the phrase *Amerika no kaisha* 'American company.' Another example is the *kono-sono-ano-dono* group that precedes a noun, as in *ano kaisha* 'that company'. These two ways can be combined as in *kono Amerika no kaisha* 'this American company.'

Adjectives can directly modify a noun to make a noun phrase (no need for the particle *no*).

<i>takai keitai</i>	expensive cellphone
<i>takaku nai keitai</i>	cellphone that is not expensive

It's possible to combine more than one adjective or other modifying elements to extend a noun phrase.

<i>chiisai takai keitai</i>	small, expensive cellphone
<i>kono Amerika <u>no</u> chiisai takai keitai</i>	this small, expensive American cellphone

Note that all the modifying elements occur before the main noun, and that the particle *no* must be attached to a noun modifier wherever it occurs. The order of modifying elements is rather free, unlike in English, where there are certain restrictions.

chiisai takai kono Amerika no keitai this small, expensive American cellphone
kono watashi no keitai this cellphone of mine
watashi no kono keitai this cellphone of mine

3-1-3 *arimasu* ‘there is X’

The verb *arimasu* means ‘there is’ or ‘I have’. It indicates inanimate existence such as objects, plants, ideas, events, etc. A different verb is used for people and animals and will be introduced later. There are two negative forms for *arimasu*: *arimasen* and *nai desu*. The latter is less formal.

As we have seen so far, *nai desu* is part of the negative forms for noun and adjective sentences. *Arimasen* can substitute for *nai desu* in these forms and sounds a little more elegant.

Sumaho ja nai desu. → *Sumaho ja arimasen.* It’s not a smartphone.
Takaku nai desu. → *Takaku arimasen.* It’s not expensive.

Similarly, the Past form *arimasen deshita* can substitute for *nakatta desu*.

Sumaho ja nakatta desu. → *Sumaho ja arimasen deshita.* It wasn’t a smartphone.
Takaku nakatta desu. → *Takaku arimasen deshita.* It wasn’t expensive.

The chart below shows all the forms including these alternatives.

Table 6. All the past forms of “arimasen” - affirmative and negative - as a verb sentence, noun sentence, and adjective sentence.

	Affirmative – Non-past	Negative – Non-past
Verb Sentence	<i>Arimasu.</i>	<i>Nai desu. Arimasen.</i>
Noun Sentence	<i>Nihon desu.</i>	<i>Nihon ja nai desu. Nihon ja arimasen</i>
Adjective Sentence	<i>Takai desu.</i>	<i>Takaku nai desu. Takaku arimasen.</i>

Table 7. All the non-past forms of "arimasen" - affirmative and negative - as a verb sentence, noun sentence, and adjective sentence.

	Affirmative-Past	Negative-Past
Verb Sentence	<i>Arimashita.</i>	<i>Nakatta desu. Arimasen deshita.</i>
Noun Sentence	<i>Nihon deshita.</i>	<i>Nihon ja nakatta desu. Nihon ja arimasen deshita.</i>
Adjective Sentence	<i>Takakatta desu.</i>	<i>Takaku nakatta desu. Takaku arimasen deshita.</i>

Note the difference between the following sentences.

Kaisha ja arimasen / Kaisha ja nai desu.
Kaisha wa arimasen / Kaisha wa nai desu.

It's not a company. (Identity)
There is no company. (Existence)

3-2-1 Numbers and Classifiers (~en, ~doru, ~ban)

Japanese numbers are listed at the end of this lesson. Note that numbers 4, 7 and 9

have alternating forms: *yon*, *yo* and *shi* for 4, *nana* and *shichi* for 7 and *kyuu* and *ku* for 9. The form depends on what classifier is combined with the number (See below for classifiers).

In Japanese, numbers with five or more places are counted in groups of four places (*~man*, *~oku*, *~chou*). On the other hand, in English these numbers are counted by groups of three places (thousands, millions, billions). So, ten thousand in Japanese has a special name *man*, and succeeding groups of four places have the names *~oku*, and *~chou*. Traditionally a comma was inserted every four places (10,000 was written 1,0000).

Note that 10, 100 and 1000 do not require *ichi*, but 10,000 does. In another words, you need to say *ichi* only for the last place in each four-place group.

1	<i>ichi</i>	10000	<i>ichi-man</i>
10	<i>juu</i>	100000	<i>juu-man</i>
100	<i>hyaku</i>	1000000	<i>hyaku-man</i>
1000	<i>sen</i>	10000000	<i>sen-man</i>

So, ¥11111111 is *sen hyaku juu ichi man sen hyaku juu ichi en*. Also note the following sound changes.

For 100's (<i>hyaku</i>)	h→b	300 <i>sanbyaku</i> ; ?00 <i>nanbyaku</i> (how many hundreds?)
	h→pp	600 <i>roppyaku</i> ; 800 <i>happpyaku</i>
For 1000's (<i>sen</i>)	s→z	3000 <i>sanzzen</i> ; ?000 <i>nanzen</i> (how many thousands?)
	s→ss	8000 <i>hassen</i>

Japanese numbers are usually followed by a classifier, which indicates what is counted or numbered. Use of 'bare' numbers is rather limited (counting the number of push-ups, etc.) When counting things in Japanese, numbers are combined with classifiers that are conventionally used for the particular nouns being counted. This is similar to English expressions like "ten sheets of paper" (not ten papers), or "a loaf of bread" (not a bread.)

Recall that the classifier for clock time is *-ji*, and grade in school is *-nensei*. We add three more in this lesson: *-en* for the Japanese currency, *-doru* for US currency, and *-ban* for numbers in order (first, second, etc.) Before *-ji*, 4, 7, and 9 are respectively *yo*, *shichi*, and *ku*. As shown in the chart below, before *-en* the number 4 is *yo*, and the numbers 7 and 9 before *-en*, *doru* and *-ban* are *nana*, and *kyuu*.

The classifier *-ban* is also used for ranking (first place, second place, etc.) *Ichi-ban* is also used as an adverb to mean 'most' or 'best.' The pitch accent changes for the adverbial use (iCHIBan

→ iCHIBAN)

<i>Ichi-ban jouzu</i>	most skillful
<i>Ichi-ban atarashii</i>	newest
<i>Ichiban ii daigaku</i>	the best college

Table 8. Classifiers for numbers 1-10, as well as an unknown number, for suffixes *-en*, *-doru*, and *-ban*

?	<i>Nan-en</i>	<i>Nan-doru</i>	<i>Nan-ban</i>

3-2-2 Pronoun *No*

Recall that we have the following three noun phrase structures.

- | | | |
|------------------------|--------------------------|-----------------|
| 1. Adjective + Noun | <i>yasui apaato</i> | cheap apartment |
| 2. <i>Kono</i> + Noun | <i>kono apaato</i> | this apartment |
| 3. Noun <i>no</i> Noun | <i>watashi no apaato</i> | my apartment |

It sounds too wordy and unsophisticated if the same noun is repeated unnecessarily. How can we avoid repeating the main noun in these structures when it is already known from the context?

- | | | |
|--|---------------------|-----------------|
| For Structure 1, replace the noun with the pronoun <i>no</i> . | → <i>yasui no</i> | inexpensive one |
| For Structure 2, use <i>kore-sore-are-dore</i> , instead. | → <i>kore</i> | this |
| For Structure 3, just drop it. | → <i>watashi no</i> | mine |

The pronoun *no* can replace the noun directly after an adjective, but is usually not used to refer to people. These rules hold when the three structures are combined.

<i>kono atarashii apaato</i>	this new apartment	→ <i>kono atarashii no</i>
<i>watashi no kono kaban</i>	this bag of mine	→ <i>watashi no kore atarashii</i>
<i>Amerika no kaisha</i>	new American company	→ <i>atarashii Amerika no</i>

3-2-3 *ka nee* 'I wonder'

Some sentence particles can occur in combination. One common combination is *ka nee* 'I wonder.' *Ka* indicates doubt and *nee* indicates that the speaker assumes the hearer has the same doubt. In the dialogue above, Michael asks if there are cheaper apartments, assuming Ms. Honda understands his situation. Compare the following:

Motto yasui no wa arimasen ka. Aren't there cheaper ones?
Motto yasui no wa arimasen ka nee. I wonder if there are cheaper ones.

While the first asks for an answer, the second does not demand a response because the speaker assumes that the other person shares the same question. The result is softer. *Ka nee* is also used as a polite response to a question when the speaker does not know the answer.

<i>Ano hito dare desu ka?</i>	Who is that person?
<i>-Dare desu ka nee.</i>	I wonder, too.
<i>Dare no kasa desu ka?</i>	Whose umbrella is it?
<i>-Dare no desu ka nee.</i>	I wonder whose it is, too.

3-3-1 Na-Nouns

When one noun describes another, there are two possible patterns. You've seen one of these already with the particle *no*: *watashi no keitai* 'my cell phone,' *nihongo no sensei* 'the Japanese teacher.'

A smaller set of nouns hooks up to nouns with the particle *na*: *kirei na nihongo* 'beautiful Japanese,' *benri na keitai* 'convenient cell phone.' These will be called "na nouns." All *na* nouns are intangible, but not all intangibles are *na* nouns. All *na* nouns will be followed by (*na*) in the glossary to distinguish them from regular nouns.

Note that the pronoun *no* can replace the main noun in this combination.

kirei na apaato a clean apartment → *kirei na no* a clean one

amerika no yuumei na kaisha a famous company in America →
amerika no yuumei na no a famous one in America

3-3-2 Adjective ~Ku Forms as Adverbs

The *-ku* form of adjectives are also used as adverbs.

Grammar Notes

3-4-1 X toka Y, X ya Y

/Noun to ka Noun/ means that the referenced nouns are examples of the category under discussion. /Noun ya Noun/ is its more formal version. More than two examples can be listed, but it's unusual to have more than three or four.

Isu toka tsukue, arimasu ka. Do you have things like chairs and desks?
Isu ya tsukue arimasu ka. Do you have things like chairs and desks?
Isu toka tsukue toka terebi, arimasu ka. Do you have things like a chair, desk, and TV?

Toka does not require another noun to follow it while *ya* does. Therefore, the following are possible.

Keitai toka tsukaimasu ka. Do you use things like smartphone?
Keitai toka sumaho toka tsukaimasu ka. Do you use things like cellphones and smartphones?

3-4-2 X mo Y mo - 'both X and Y' 'neither X nor Y'

X mo Y mo means 'both X and Y' in an affirmative sentence and 'neither X nor Y' in a negative sentence. Compare the three responses below.

Kore to are, irimasu ka. Do you need this and that?
 -*Hai, kore mo are mo irimasu.* Yes, I need them both.
 -*Iie, kore mo are mo irimasen.* No, I don't need either this or that.
 -*Iie, kore wa irimasu kedo, are wa irimasen.* No, I need this, but I don't need that.

In the first two responses, both items share a similarity, i.e., you need both or you don't need either, but in the third sentence the two items are being contrasted, i.e. you need one but not the other, thus the particle *wa* is used.

Grammar Notes

4-1-1 ~*mashou*, Suggesting or Offering to Do Something

The *-mashou* form is made by changing *-masu* to *-mashou*. A verb in the *-mashou* form means ‘let’s do X’ or ‘why don’t I do X’. It is used to make a suggestion or offer to do something.

Kaerimashou. Let’s go home.
Tetsudaimashou ka? Shall I help you?

While the speaker is always included as a doer of the action, the addressee might not be included depending on the context.

Ekuseru o tsukai mashou. Let’s use Excel. Or, Why don’t I use Excel.

Now, how do you respond to a suggestion or an offer made to you?

- When suggested to do something:

To accept	<i>Sou shimashou.</i>	Let’s do that.
To disagree politely	<i>Iya, chotto....</i>	No, just....
- When someone has offered to do something for you:

To accept it	<i>Hai, onegai-shimasu.</i>	Yes, please.
To turn it down	<i>Ie, daijoubu desu.</i>	No thank you (I’m fine.)

Note that the question form *-mashou ka* typically has a falling intonation. It is more polite than *-mashou* alone because the addressee can say no to the question.

Verbs such as *arimasu*, *dekimasu*, and *wakarimasu* do not occur in the *-mashou* form because they all indicate something beyond one’s control.

4-1-2 Particle *O* Marking the Object

Every Japanese sentence has a subject, although it is not always explicitly stated. On the other hand, the occurrence of an object is more limited. This only occurs

with certain verbs (transitive verbs, explained later) and usually does not occur in an adjective or noun sentence. In Lesson 1, it was explained that the object of the verb is placed before the verb with or without the particles *wa* (contrast) or *mo* (addition). In this lesson, the particle *o* is added. Consider the following.

<i>Kore tabemasu.</i>	I'll eat this.
<i>Kore wa tabemasu.</i>	This, I'll eat (while I won't eat that).
<i>Kore mo tabemasu.</i>	I'll eat this, too.
<i>Kore o tabemasu.</i>	It's this that I'll eat.

In all these sentences, *kore* is the object of the verb *tabemasu*. When the object is marked by the particle *o*, the focus is on this item and this item only as the one that you eat. So the last sentence above is typically the answer to the question of 'what will you eat.'

Depending on the context, what is focused on may be 1) the *o*-marked object alone or 2) the entire sentence, which presents new information that has not yet been mentioned in the conversation. A very common situation for 1) is in combination with question words (what, who, which, etc.) Question words are inherently focused and thus followed by the particle *o* (not *wa* or *mo*.) Similarly, in a yes-no question, the object, when focused, is marked by the particle *o*.

1) The object noun is focused.

<i>Dore o tabemasu ka.</i>	Which one will you eat?
<i>Kore desu.</i>	It's this.
<i>Kore o tabemasu.</i>	I'll eat this. (This is the one I'll eat.)

Now let's see how yes-no questions are answered when the wrong object is presented. The following are two typical answers.

<i>Pasokon o tsukaimasu ka.</i>	Is it a laptop that you use?
<i>Iya, pasokon ja nai desu. Sumaho desu.</i>	No, it's not a laptop. It's a smartphone (that I use.)
<i>Iya, pasokon wa tsukaimasen. Sumaho o tsukaimasu.</i>	No, I don't use a laptop. I use a smartphone.

Note that in the second answer *pasokon* takes the particle *wa*, while *sumaho* takes the particle *o*. This is because *sumaho* is the focused item being newly presented. On the other hand, *pasokon* has been already mentioned and the particle *wa* here indicates that *pasokon* is in contrast to *sumaho*.

2) The entire sentence presents new information.

For example, in the dialogue above, the fact that Michael will use Excel is new information and explains why he does not need help. Here are more examples of this type.

Dekakemasen ka? Won't you go out?
Iya, nihongo o benkyou-shimasu. No, I'll study Japanese.

Purezen desu yo. It's a presentation.
Ja, pawaapointo o tsukurimashou. Well then, let's make PPT.

4-1-3 Reason + *Kara*

The clause particle *kara* connects two sentences together to make one. In the sequence of /Sentence A *kara*, Sentence B/, Sentence A represents the cause and Sentence B the effect.

Takai desu kara, kaimasen. Because it's expensive, I'll not buy it.
Wakarimasen kara kikimasu. Because I don't understand it, I'll ask.

Sentence B can be left unsaid when it is understood from the context.

Ikimasen ka. You are not going?
Ee, ame desu kara. Right, because it's raining.

The clause particles *kara* and *kedo* are opposites of each other. Compare the following.

Takai desu kara, kaimasen. It's expensive, so I'll not buy it.
Takai desu kedo, kaimasu. It's expensive, but I'll buy it.

There are three Japanese words for 'why.' *Dou shite* is most common, *naze* more formal, and *nan de* is casual. *Desu ka* can directly follow them if the rest of the sentence is understood from the context.

Dou shite kaimasen ka? Why don't you buy it?
Dou shite desu ka? Why is it (that you don't buy it)?

Grammar Notes

4-2-1 Particle *Ga* Marking the Subject

Recall that the subject of a sentence can be placed in front of a verb, adjective or noun + *desu* in spoken Japanese without any particle or with the particles *wa* or *mo*. In this lesson, the particle *ga* is added.

Kono apaato, takai desu. This apartment is expensive

Kono apaato wa takai desu. This apartment is expensive (while others may not).

Kono apaato mo takai desu. This apartment is also expensive.

Kono apaato ga takai desu. It's this apartment that is expensive.

The particle *ga* follows the subject noun in situations where 1) special focus is placed on the subject, or 2) the entire sentence presents new information. Situation 1) commonly occurs in combination with question words. In answering these questions, it is common to use particle *ga* with the noun, or to just give the noun + *desu*.

- 1) The subject noun is focused.

<i>Dare ga, ikimasu ka.</i>	Who is going?
- <i>Honda-san desu.</i>	It is Honda-san (who is going).
- <i>Honda-san ga ikimasu.</i>	Ms. Honda is going.

In Dialogue 2 above, when Michael suggests making tea, Ms. Honda says *Watashi ga iremasu* 'I will make tea (not Michael or anyone)' putting a focus on her as THE person to make tea. Another similar example in the dialogue is when Michael asks what Ms. Tanaka wants. Michael says *nani ga ii desu ka* putting a focus on 'what'.

2) The entire sentence presents new information.

<i>Kaerimasu ka?</i> Are you going home?
- <i>Hai, shukudai ga arimasu kara.</i> Yes, because I have homework.

Here having homework is new information and explains why the speaker is going home. It's not *shukudai* alone that is focused here ('it is homework that I have') but rather the sentence as a whole is focused ('it's that I have homework.')

4-3-1 Double-Subject Structures

A Japanese sentence can have more than one subject phrase. This is called a double-subject sentence.

Maikeru-san wa [ohashi daijoubu desu.] Michael is fine with chopsticks.

In the sentence above, *ohashi* is the subject of the bracketed sentence, and *Maikeru-san* is the subject of the entire sentence. In other words, the bracketed sentence ‘chopsticks are fine’ is an attribute of or a description about Michael. Similarly, in the examples below, the bracketed sentences are facts about the preceding nouns.

<i>Furansu wa [keeki ga oisii desu].</i>	France has good cake.
<i>Honda-san wa [eigo wa jouzu desu] kedo...</i>	Honda-san is good at English, but....
<i>Dare ga [eigo ga dekimasu] ka.</i>	Who can speak English?
<i>Watashi mo [sushi ga suki desu] kedo.</i>	I like sushi, too.

As shown above, both of the subject nouns (inside and outside of the brackets) can take the particles *ga*, *wa*, *mo*, or no particle. Depending on which particle is used, there is a shift in meaning (*ga*=new information, *wa*=contrast, *mo*=addition, or no particle= neutral).

Special note should be taken of nouns such as *suki* ‘like’, and *kirai* ‘dislike’, and the verbs such as *wakarimasu* ‘understand’, *dekimasu* ‘can do’, *arimasu* ‘have’, and *irimasu* ‘need.’ These all indicate a state rather than an action in Japanese. Therefore, unlike their English translations, they do not take an object. What you like, what you understand, etc., can be marked by the particles *ga*, *wa*, or *mo*, or no particle, but not by the particle *o*.

<i>Honda-san wa sushi ga suki desu.</i>	Ms. Honda likes sushi.
<i>Watashi wa terebi wa irimasen.</i>	I don't need a TV.
<i>Kono daigaku wa arabiago no jyugyou mo arimasu.</i>	This university has an Arabic class, too.

By the way, there is no such thing as a double-object structure in Japanese. Whew!

4-3-2 Verb Stem + *tai* ‘want to do x’

Tabetai desu means ‘I want to eat’. To make the *tai* form of a verb, replace *~masu* with *~tai desu*.

<i>Tabemasu</i> → <i>Tabetai desu</i>	I want to eat it.
<i>Mimasu</i> → <i>Mitai desu</i>	I want to see it.

A *~tai* form is an adjective. All of its forms follow the adjective patterns.

Table 14. Affirmative, negative, past and non-past forms of the verb *tabemasu*.

	Affirmative	Negative
Non-past	<i>tabetai desu</i>	<i>Tabetaku nai desu</i> <i>Tabetaku arimasen</i>
Past	<i>tabetakatta desu</i>	<i>Tabetaku nakatta desu</i> <i>Tabetaku arimasen deshita</i>

X-tai desu is typically used to express the speaker's desire ('I want to ...') and to ask the addressee's desire ('Do you want to...?') but not a third person's desire ('He wants to ...') Describing other people's wants will be discussed later.

With the *~tai* form, the object of the verb can be marked either by the particle *ga* or *o* (*ga/o* conversion). Both of the following sentences are possible and mean 'I want to study Japanese.'

Nihongo o benkyou-shitai desu. What I want to do is to study Japanese.
Nihongo ga benkyou-shitai desu. What I want to study is Japanese.

Unlike the English forms such as 'do you want to' or 'would you like to', which can be used to invite someone to do something, the *~tai* forms are not generally used as invitations or suggestions in Japanese. For invitations and suggestions, negative questions are more commonly used.

Tabemasen ka? Would you like to eat it? (Invitation)
Tabetai desu ka? Do you want to eat it? (Question)

The verbs that do not occur in the *~mashou* form also do not occur in the *~tai* form. These include *wakarimasu*, *irimasu*, *arimasu* and *dekimasu*.

4-4-1 More Classifiers: *~hon*、*~tsu*

In Lesson 3, it was explained that when counting things in Japanese, numbers are combined with specific classifiers that are conventionally used for the nouns being counted. We add two classifiers, *~hon*、*~tsu*, in this lesson.

The classifier *~hon* is used to count long cylindrical objects such as bottles, pens, umbrellas, bananas, etc. The classifier *~tsu* is the most generic classifier, which can be used for both tangible and intangible items such as opinions, meetings, etc. It is also used for items that do not have a special classifier. So, it may be a safe choice when you are not sure what classifier to use.

There are two numerical systems in Japanese: one of Chinese origin, which was introduced in Lesson 3, and another system of Japanese origin. The latter only goes up to the number ten.

1 *hito*, 2 *futa*, 3 *mi*, 4 *yo*, 5 *itsu*, 6 *mu*, 7 *nana*, 8 *ya*, 9 *kokono*, 10 *tou*

The classifier *~hon* is combined with Chinese numerals. Note that alternatives for *~hon* are *~pon* (for 1, 6, 8, 10) and *~bon* (for 3 and how many). The classifier *~tsu* is combined with Japanese numerals and for quantities over ten Chinese numerals without a classifier are used: *juu-iti*, *juu-ni*, *juu-san*, etc.

4-4-2 Quantity Expressions

There are two kinds of quantity expressions in Japanese. One is comprised of a number and classifier (*san-bon*, *hito-tsu*, etc.) and the other is a general quantity expression (*chotto*, *suskoshi*, *takusan*, *zenbu*, *minna*, etc.) Within a sentence they both usually occur right before the verb, adjective, or noun +*desu*. Unlike English, the noun usually comes before the amount in Japanese.

Biiru, san-bon kudasai.

Three (bottles of) beers, please.

Sashimi wa hito-tsu 1000-en desu.

One sashimi is ¥ 1000.

Mizu o sukoshi nomitai desu.

I want to drink a little bit of water.

As shown in the examples above, a quantity expression is typically marked by the lack of a particle. It is not followed by the particle *ga* or *o*. However, it can be followed by the particle *wa* or *mo*. When *wa* follows a quantity expression, it means

‘at least’ and when *mo* follows it, it implies that the number is big (that much!)

Mainichi, shukudai ga hito-tsu wa arimasu.

I have at least one HW assignment everyday.

Obentou o futatsu mo tabemashita. I ate all two bentos.

How are multiple items and numbers listed up in Japanese? Suppose we want to say ‘Three apples and four oranges, please.’ Combine the following two sentences into one.

Ringo o mit-tsu kudasai.

Three apples, please.

Mikan o yot-tsu kudasai.

Four oranges, please.

→ [*Ringo o mit-tsu*] to [*mikan o yot-tsu*] *kudasai.*

Three apples and four oranges, please.

There is no limit on how many things can be listed, but it is rare to list more than three items.

Onigiri ga mit-tsu to sando ga itsu-tsu, sorekara mizu ga ni-hon arimasu.

There are three *onigiri*, five sandwiches, and two bottles of water.
